

Pearl Knotting

Learning Objective: This hands-on seminar will focus on the proper technique of pearl knotting to ensure high quality end products. Participants will experiment with various tools and Crystallized™ pearls to create a beautiful, hand-knotted jewelry piece.

Class size: 25 Participants

Class duration: 3 hours

Learning Concepts: At the end of this seminar participants will know:

- How to utilize The Tri-Cord™ Knotter tool used for this technique
- The steps needed to successfully hand-string pearls

Benefits of Participation:

- Learn several techniques, tips and tricks that can be used with any pearls.
- Learn how using crystal elements can customize your designs so you stand out in the marketplace.
- Work with the leader in crystal elements with over 70 colors and effects, the widest range of shapes and sized and semi-finished products.
- Work with the highest quality products to ensure superiority in your end product.
- Work with the market leader setting industry standards.
- Discover new innovations that make it easier for you to create innovative products.
- Work with a trend competent partner and differentiate yourself and your product from the rest.

Who Should Attend:

This hands-on seminar is for fashion/jewelry designers, design students, instructors & manufacturers interested in learning proper pearl knotting techniques using Crystallized™ pearls and elements to ensure high quality innovative fashion products.
